Autologic 2016

Disclaimer – This information is provided as a guide only and subject to change by the vehicle manufacturer. Autologic cannot be held responsible for any errors regarding manufacturer information that leads to diagnosis or programming malfunctions. This document is regularly updated so please check for latest version. E&OE.

The main information application from Volvo is called VIDA (Vehicle Information and Diagnostics for Aftersales).

VIDA supports workshops in repairing and servicing Volvo vehicles by providing:

- Service information
- Parts information
- Diagnostic fault tracing
- Software download capability

These are all integrated into one single application.

Capabilities

Volvo VIDA offers full dealer level diagnostics for cars from 1999 onwards.

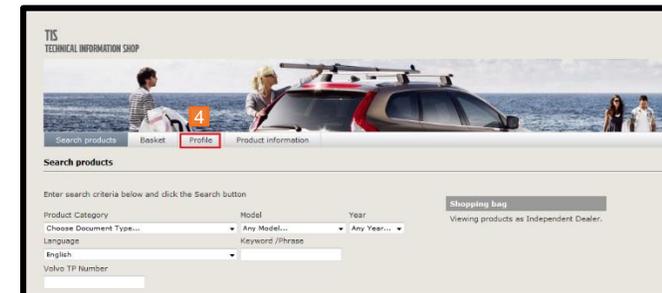

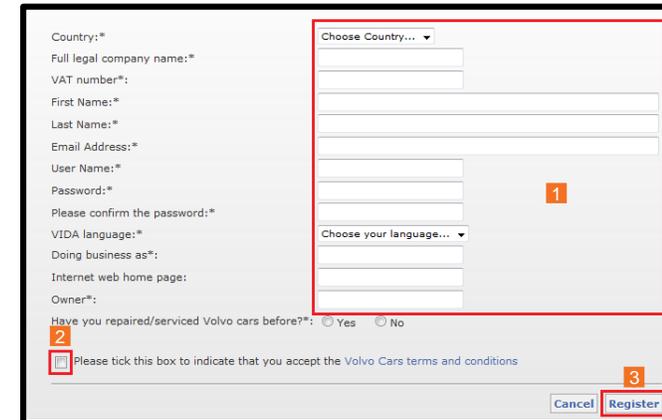

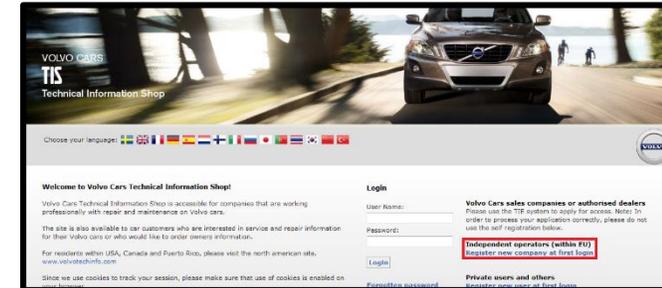

VIDA is installed locally on the computer running it, but for authentication and programming an internet connection is necessary. VIDA is distributed online and when a new version is released, this is updated automatically. The technician will require an active subscription for the updates to take place.

VIDA Registration

To register, visit <http://tis.volvocars.biz/tis/main.do>

This will take you to the VOLVO CARS Technical Information Shop (TIS)
